PRIVATE WEALTH · BY INTRODUCTION

Your whole balance sheet, *in one quiet room.*

Vanta brings custodial accounts, private funds, real estate, trusts and collectibles into one live view. Then it tells you, in plain language, the three things worth your attention this quarter.

Explore the live demo → Request an introduction

For families and family offices with $10M+ in investable assets. Demo uses an illustrative household.

CONSOLIDATES Custodial & brokerage · Private equity & credit · Direct real estate · Trusts & entities · Art & collectibles · Operating-company stock

THE PRODUCT

Built around the three decisions a principal makes every quarter.

Most wealth reporting answers "what happened." Vanta is designed to answer "what should I do about it," and to stay quiet when the answer is nothing.

SEE

One number you can trust

Liquid and illiquid assets marked daily or at their last valuation, with the source and date shown next to every figure.

Private fund NAV **as of 30 Sep** · Residence **appraised Jun 2026** · Brokerage **live**

PLAN

Goals in probabilities

Every goal shows its chance of being fully funded, and how that changes if you add capital or take more risk.

Foundation endowment · **58% → 81%** with +$250K/yr

ACT

Signals, not noise

Allocation drift, idle cash, concentration and tax-loss opportunities, each with its dollar impact and a one-tap handoff to your advisor.

Harvestable losses **$412K** · est. tax saved **$98K**

WHY VANTA

The quarterly PDF, retired.

QUESTION	TODAY	WITH VANTA
What are we worth?	Four statements, three logins, a spreadsheet your CFO updates monthly	One consolidated figure, refreshed daily, every source dated
Are we on track?	An annual planning meeting and a 40-page binder	A live probability for each goal, with the levers that move it

QUESTION	TODAY	WITH VANTA
What needs attention?	Whatever the advisor raises on the call	Ranked insights with dollar impact, reviewed before the call
Who can see what?	Everyone with the PDF	Per-person access: heirs, trustees, CPA and advisor each see their slice

SECURITY

Read-only by design.

Vanta can see your accounts. It can never move money out of them.

Read-only connections

Aggregation uses view-only credentials. Trading and transfers stay with your custodian.

Hardware-key sign-in

Passkeys or a physical security key for every household member. No SMS codes.

Privacy mode

Blur every balance with one keystroke when you open the app in a meeting or on a plane.

Scoped sharing

Grant your CPA the tax lots, your trustee the trust, and nothing more. Revoke in one click.

MEMBERSHIP

Membership is by introduction.

We onboard a small number of households each quarter, so each one gets a dedicated data team for the first 90 days. Tell us a little about yours.

Insights

Ranked by estimated dollar impact. Reviewed by your advisor before each quarterly call.

All 5 | Risk 1 | Allocation 2 | Tax 1 | Cash flow 1

Serious

Halvorsen Robotics is 15.6% of your liquid portfolio

A 30% drop in HLVR would cut liquid wealth by about $1.92M. The lock-up on 40% of these shares ends 15 Jan 2027. An exchange fund or a 10b5-1 plan can reduce this without a large tax bill.

`Exposure $6.38M · policy limit 10%`

Explore diversification | Dismiss

Action

Equities are 5.7 pts above policy; fixed income 3.2 pts below

Both are outside the ±2.5 pt rebalance band after the third-quarter rally. A rebalance inside tax-advantaged and trust accounts first avoids realizing gains in the joint account.

`Move ≈ $3.63M from equities to fixed income`

PROPOSED TRADES · FOR ADVISOR REVIEW

Side	Holding	Account	Amount
Sell	US Total Market Index	Revocable trust (no gain realized)	$2M
Sell	US Small Cap Value Index	Joint brokerage · long-term lots	$1.63M
Buy	Municipal bond ladder 2027–2034	Separately managed	$2.54M
Buy	US Treasury bills	Joint brokerage	$1.09M

Estimated realized gain: $0 in the trust, $184K long-term in joint brokerage. Post-trade drift: within band for all classes.

Hide preview | Dismiss

Opportunity

$412K of harvestable losses in emerging-markets lots

Lots bought in Feb 2025 sit below cost. Selling and swapping into a similar, not substantially identical fund keeps your exposure and banks the loss against this year's gains.

`Estimated tax saved ≈ $98K at your blended rate`

Send to CPA | Dismiss

Action

$2.8M is sitting in checking at 0.40%

Your operating account holds about 14 months of spending. Moving the amount above a 6-month reserve into Treasury bills would earn roughly 3.9% more, state-tax free.

`Est. +$62K a year in interest`

Move excess cash | Dismiss

Upcoming

Capital call: $750K to Northgate Growth Fund IV, due 14 Nov

Treasury bills maturing 7 Nov cover this call. No action is needed unless you want to fund it from elsewhere.

`Unfunded commitment remaining: $2.25M`
